

Toulouse, January 9th, 2019

AIRBUS DEFENSE AND SPACE and NEXEYA sign a partnership in New Space.

On Tuesday, January 8, 2019, NEXEYA and AIRBUS DEFENSE AND SPACE SAS signed a partnership agreement on the nano-satellite market.

NEXEYA will offer its range of HEMERIA nano-satellites, in the size segment from 6U to 27U, and will benefit from the expertise of AIRBUS as prime contractor and integrator of complex space systems.

The price / performance ratio and the speed of implementation make it possible to envisage a wide range of new applications.

Thanks to this agreement, NEXEYA and AIRBUS will be able to explore the opportunities promised by the nano-satellite constellations and offer new missions in the field of demonstrators and operational programs.

About NEXEYA – WWW.NEXEYA.COM

NEXEYA designs, tests, and maintains critical electronic systems for the aeronautics, defense, space, energy, and transport industries.
