COMMUNICATION

Installation and maintenance navigation aid systems

Repairs on site or at our workshop

CNS certification

In France and abroad

To optimize the availability of your runways, HEMERIA sets up and maintains nav aids on military airbases and civil airports, thus guaranteeing a safe landing for aircrafts, regardless of the weather.

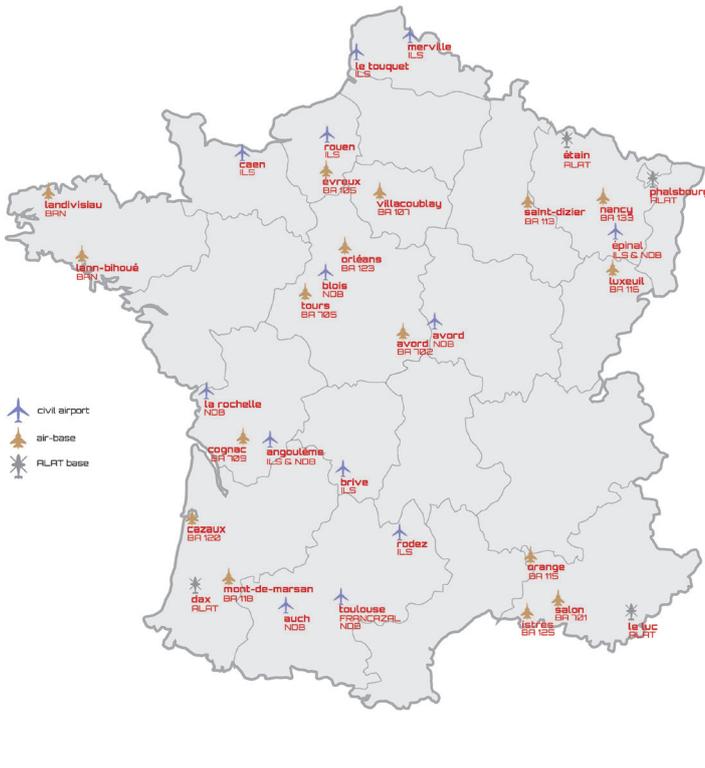

Our extensive service portfolio

- Supply and installation of navigation aids: ILS, DME, VOR, NDB, radio direction finders, etc.
- Preventive and corrective maintenance
- Relocation of systems, antennas and shelters
- Repair of systems, subsystems and components, on site or in our workshop
- Refurbishment of shelters and antennas, localizers and glides

Our certification

- European CNS certification (Communication Navigation Surveillance) for air navigation service provider.

Detailed view of our interventions in France

HEMERIA also works abroad

- HEMERIA has set-up navigation aid systems on two civilian international airports in Ivory Coast. We also ensure preventive maintenance.
